

# China

Spatial match between flow and spatial data  
Population counts

# Correction

Flow = 352 areas

Corrected areas = 352 areas

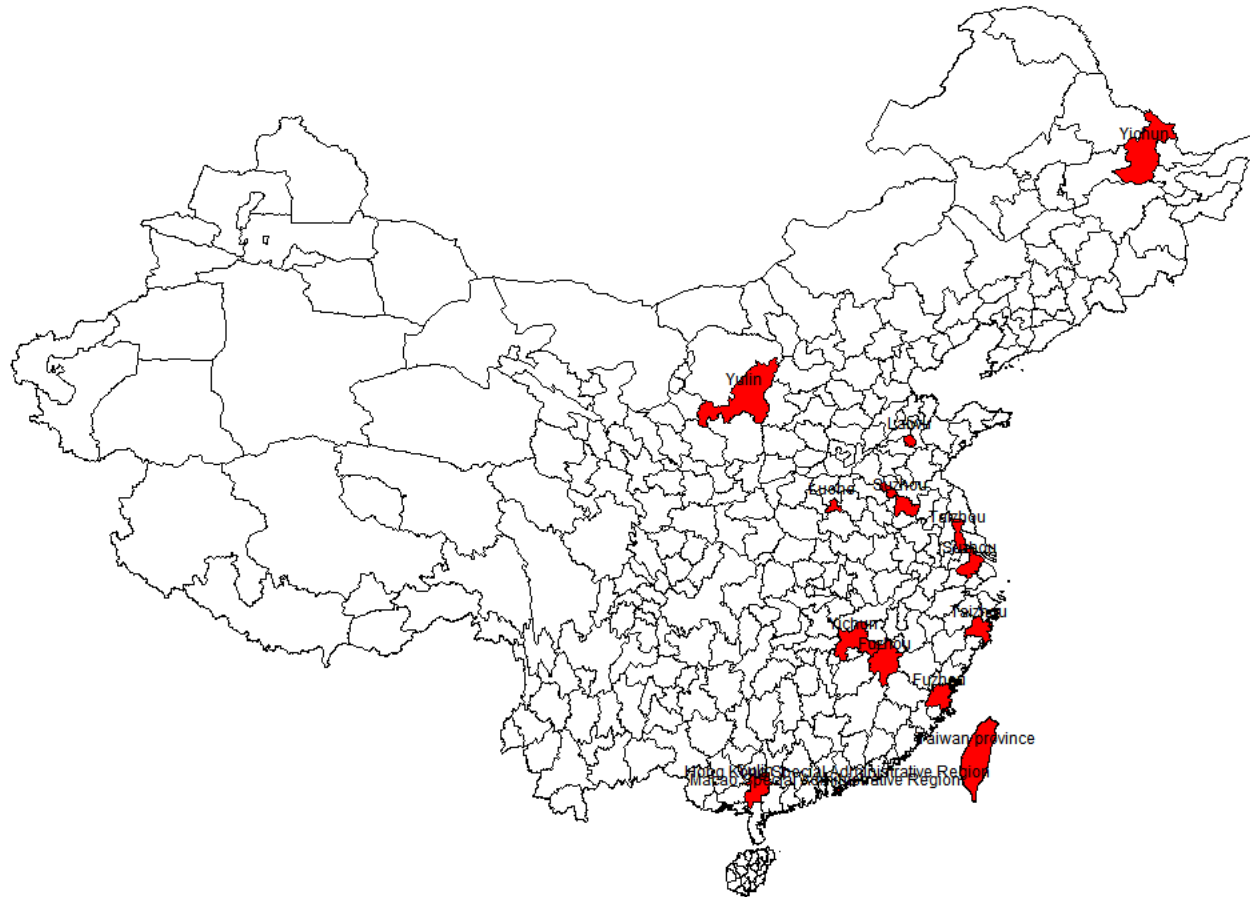

# Flags

- Exclusive from shapefile (N=10)
- In both datasets but different spatial level (one large polygon for 2 or more smaller areas of flow) (N=5)

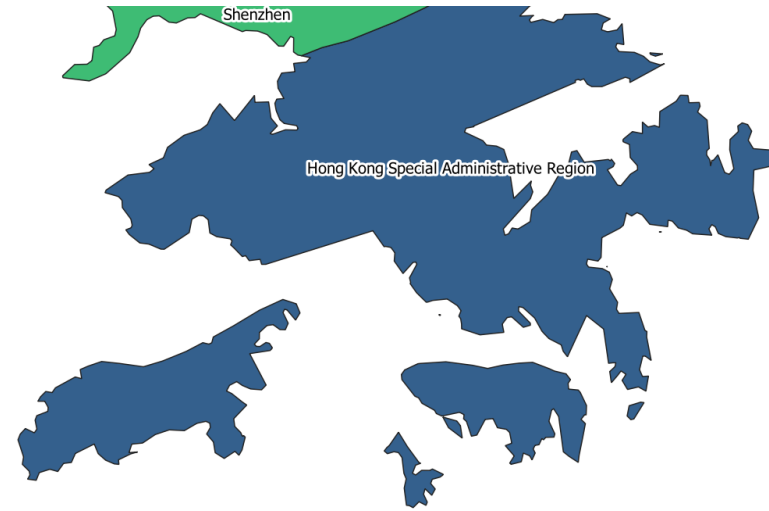

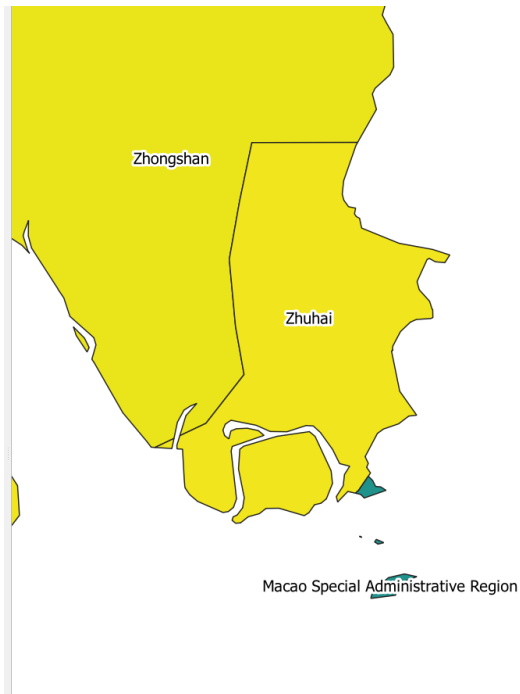

# 10 areas only in shapefile

Only in shapefile

# Potential decisions: delete

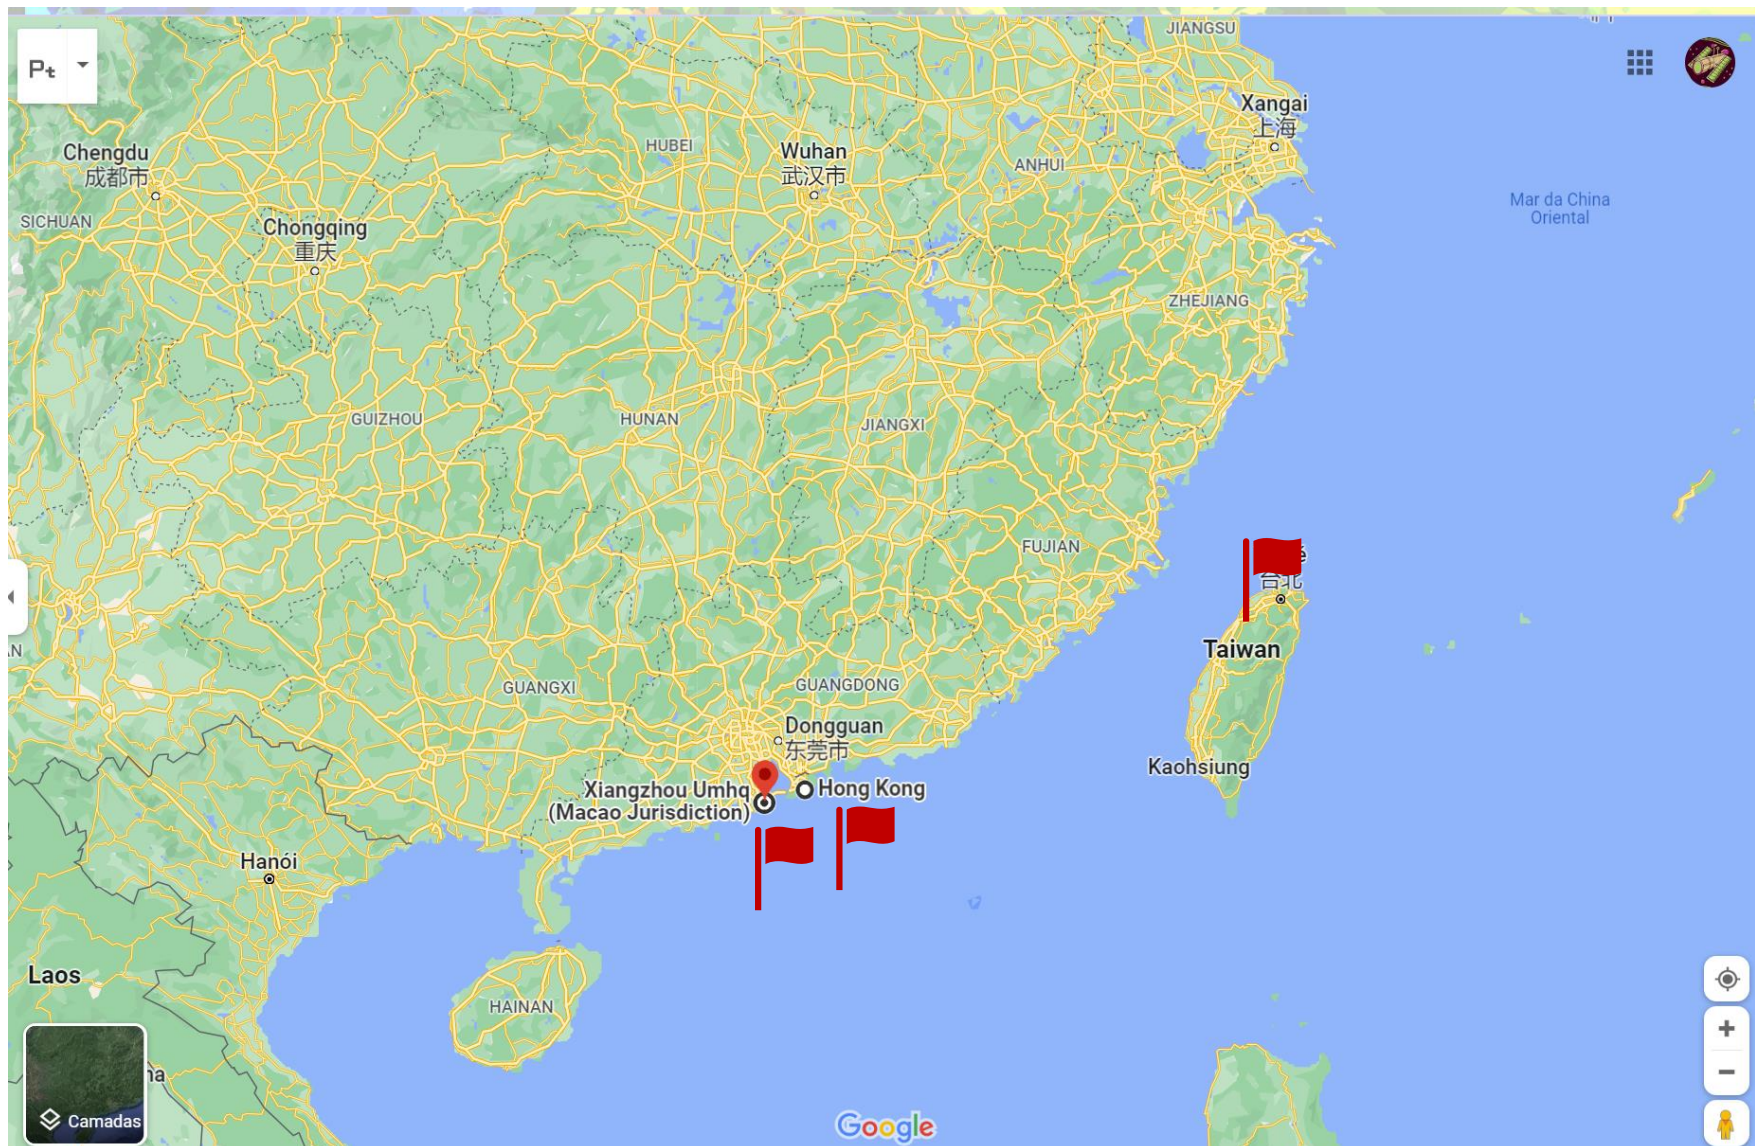

- Taiwan province
- Hong Kong SAR
- Macao SAR

# Ideas of approximation to match flow by summing or merging data

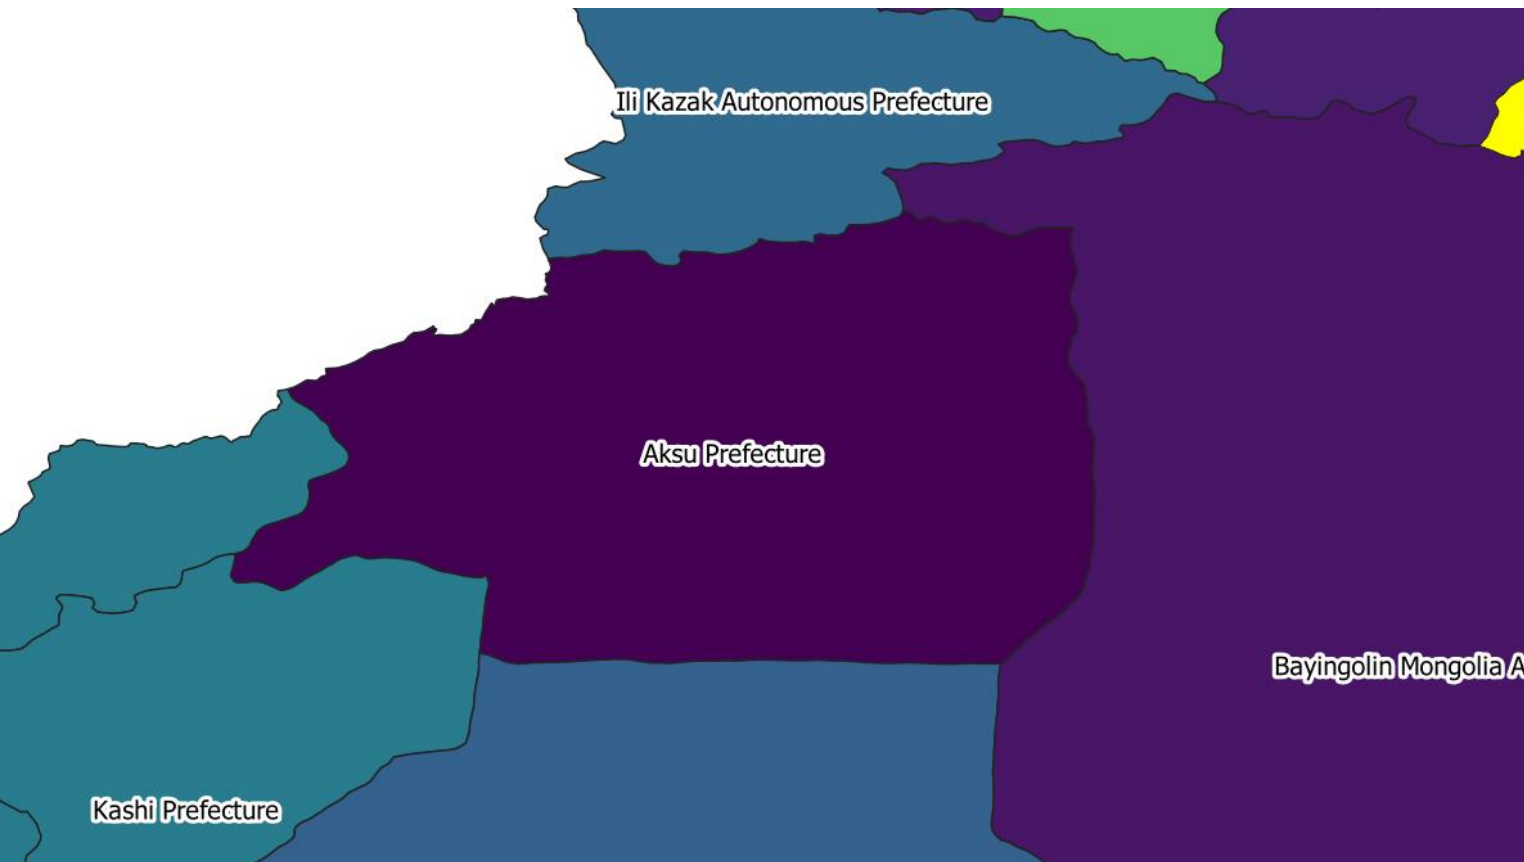

- [Luohe](#) is close to Zhoukou
- Laiwu is close to Tai'an
- Yulin is close-ish to Guigang
- Fuzhou is close-ish to Yingtan
- Yichun is close to Pingxiang
- Suzhou is very close to Wuxi
- Taizhou is close to Yangzhou
